

## WINTER LAYUP™ 1-STEP CARE:

POOL SIZE IN U.S. GALS.	WINTERIZER™ TREATMENT		
	INITIAL DOSEAGE		*MAINT. DOSEAGE EVERY 60 DAYS
	CLEAN	VISIBLE ALGAE	
10,000	1/4 Quart	1 1/4 Quarts	1/4 Quart
20,000	1 1/2 Quarts	2 Quarts	1 Quart
40,000	3 Quarts	4 Quarts	2 Quarts

\*60-Day Dosage applies only to uncovered pools.

This fall, "Take A Vacation From Chlorination" and keep your pool water treated with just Pooltec Winter LayUp.™ Using Pooltec throughout the non-swimming season not only controls algae and keeps pool water clear, but also allows a quicker start-up in the spring. Winter LayUp with Pooltec is easy, requires minimal effort, reduces pool filter time and provides very effective protection for both covered and uncovered pools from fall to spring.

**BEFORE YOU START:** For best results, adjust pool water pH to between 7.4 and 7.6 with an alkalinity level in the range of 80 to 120 ppm. Further pH adjustment is seldom needed (for most pools) as long as water pH remains between 7.2 and 8.2. Remove excess leaves and debris in pool basin to prevent surface stains. For added protection, super chlorinate or shock pool as you begin to Winter LayUp with Pooltec. Further pool chlorination is unnecessary.

### USING POOLTEC FOR WINTER:

At the end of the swimming season when water temperature has dropped below 70°, add the correct Pooltec "Initial Dosage" under either "Clean" or "Visible Algae." Swimming pools with visible algae should follow summer cleanup instructions before Winter LayUp. As needed, operate pool filtering system to keep surfaces clean from dirt and debris. Pooltec requires only minimal pump circulation time as it is unaffected by evaporation, sunlight, and temperature. Winter treatment of clean pools with Pooltec usually eliminates sanitizer usage and reduces pool testing during the non-use period. It is normal for chlorine or other sanitizer levels to completely evaporate (disappear) within several weeks after beginning Pooltec Winter LayUp treatment.

**For Covered Pools:** Only the "Initial Dosage" is required for your pool size.  
**For Uncovered Pools:** The "Maintenance Dosage" is required every 60 days until spring starts.

In general, Pooltec is compatible with those chemicals normally used to treat pool and is effective at both acidic and alkaline pH. Do not mix Pooltec directly with concentrated dry or liquid chlorine products. Pooltec does not change water pH and is non-foaming and non-staining. Swimmers can use swimming pool immediately after treatment.

## CONCENTRATE FOR ALL TYPES OF SWIMMING POOLS

# POOLTEC®

## The Easiest Year-Round Pool Treatment

### Unique Synergy Keeps Water Algae-Free And Crystal-Clear

★ **SUMMER . . . Easier 2-Step Treatment With Less Chlorine**  
Improves Water Quality And Swimmer Comfort

★ **WINTER . . . Easier 1-Step Treatment Without Chlorine**  
Protects Uncovered, Mesh And Covered Pools

KEEP OUT OF REACH OF CHILDREN

**CAUTION:** See Side Panel For Additional Precautionary Statements

**ACTIVE INGREDIENTS:**  
Poly (aryethylene dimethylimino-ethylene dimethylimino) ethylene dichloride . . . 30%

**INERT INGREDIENTS:** . . . . . 70%  
100%  
This product contains 2.67 lb. of active ingredients and weighs 8.9 lb. per gallon.

## SUMMER 2-STEP CARE:

POOL SIZE IN U.S. GALS.	SUMMER TREATMENT		
	INITIAL DOSEAGE		WEEKLY DOSEAGE
	CLEAN	VISIBLE ALGAE	
10,000	1 to 2 Caps	1 Quart	1/2 to 1 Cap
20,000	2 to 4 Caps	1 1/2 to 2 Quarts	1 to 2 Caps
25,000	3 to 6 Caps	2 1/2 to 3 Quarts	1 1/2 to 3 Caps

(NOTE: Use higher Weekly Dosage for heavily used pools.)

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in manner inconsistent with this labeling.

Pooltec provides an easier, more effective year-round treatment. Pooltec keeps water continuously clear and helps remove and prevent green, blue-green, yellow and black type algae in swimming pools. Pooltec not only improves water quality, but its synergistic action with all types of chlorine and bromine products provides superior treatment results. The "Summer 2-Step" maintenance program and the "Winter 1-Step" LayUp treatment finally make year-round pool care simple and most effective.

**BEFORE YOU START:** The most effective use of Pooltec to keep water clear and to remove and control all types of algae growth is best achieved when pool equipment has been checked and is working properly. If needed, backwash or clean filter according to proper procedures. Adjust water pH balance to maintain a pH level from 7.2 to 7.6 in recreational water using a sanitizer. Maintain chlorine (or other sanitizer) treatment residual as recommended by product label instructions.

### USING POOLTEC IN SUMMER:

**MAINTENANCE:** To maintain water clear and algae-free, add the proper Pooltec initial dosage under "Clean" for your pool size. Therefore, the addition of Pooltec "Weekly Dosage" not only makes for easier pool maintenance by keeping water clear and algae-free, but usually reduces chlorine consumption and shocking frequency in residual swimming pools.

**CLEANUP:** For maximum effectiveness (pools containing heavy algae growth should be cleaned of excess debris). Add and dispense proper Pooltec dosage under "Visible Algae" directly to pool water. Use maximum "Visible Algae" dosage for yellow or black type algae. Superchlorinate or shock treatments further enhance Pooltec's removal of algae. Operate circulation pump during the algae cleanup period to ensure thorough distribution and maximize cleanup effect. Brush dead algae (especially yellow) from pool surfaces for more effective algae removal by filtration. Use a special wire brush and frequently scrub black algae.

## PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** May be harmful if swallowed. Avoid prolonged direct contact with skin, eyes and clothing.

**FIRST AID: IF SWALLOWED:** Call a Poison Control Center or doctor immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless advised by poison control center or physician. Do not give anything by mouth to an unconscious person. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin with water. **IF IRRITATED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes then continue rinsing eye. Call the poison control center or doctor for further treatment advice. Have the product container or label with you when calling or going for treatment.

**ENVIRONMENTAL HAZARD:** This pesticide is toxic to fish. Keep out of lakes, streams, and ponds. Permits may be required for discharges containing this pesticide into lakes, ponds and public water. For guidance, contact the regional office of the Environmental Protection Agency.

**STORAGE & HANDLING:** Keep container closed when not in use. **SAFETY:** Avoid contact with eyes, nose, mouth, and clothing. Do not spray directly with other pool chemicals.

**DISPOSE:** Do not reuse empty container. Tightly close container and dispose in trash.
